Week 9 Summaries

Article 1: Dyson headphones come with air vacuum for mouth

Dyson is a company that is very well known for their vacuum cleaners. Recently, they just announced a very innovative product in the tech industry. It is known as “Dyson Zone Air-purifying Headphones”. It is basically a pair of headsets with a mask that covers your nose. The mask is supposed to clean the air that you breath in. It has fans and filters that take in the outside air when you breath in, but it purifies before you inhale. Dyson has been working on the prototype for around 6 years. There is also an app with this gadget that notifies you when the filter needs to be replaced, it tracks your breathing habits, and it also gives the location and addition features that are in process. The headphones are noise cancelling and battery life of around 4 hours based on how you use the filter

Article 2: Waymo says fully driverless rides are coming to San Francisco

Waymo is a company that has been working on bringing the self-driving car to the people for everyday commute. They are planning to start offering rides in their cars soon. Their concept of self-driving cars is a bit different. They are having it so that the car itself is self-driving but there is a safety concern, so they are adding a human safety driver behind the wheel at all times. These vehicles are planned to available 24/7 in San Francisco and other locations. Waymo has been testing their models for a decade now. They are certain that their project is almost ready to be deployed and ready for people to use it.

@misc{wakefield_2022, title={Dyson headphones come with Air Vacuum for mouth},
url={<https://www.bbc.com/news/technology-60927032>}, journal={BBC News},
author={Wakefield, Jane}, year={2022}, month={Mar}, abstract{This article is important
because the population that we are putting out there in the air is a lot and We know that it
is affecting humans. So, to save our health, discovery like this is very important. It is
interesting because the concept of wearing a headset and a mask together is something that
will be interesting to adapt to if it ever becomes a thing} }

@misc{hawkins_2022, title={Waymo says fully driverless rides are coming to San Francisco},
url={<https://www.theverge.com/2022/3/30/23002082/waymo-driverless-san-francisco-downtown-phoenix>}, journal={The Verge}, author={Hawkins, Andrew J.}, year={2022},
month={Mar}, abstract{This topic is very interesting because we all know that the next big
thing in the automobile industry is self-driving cars and maybe flying cars after that. Every
update we get about those shows us how close we are to the future. It is interesting because
Waymo is going to be like a service that people can use but it is self-driving and follows
the safety protocols.} }
